

1 ratchet mechanism operatively connected to said tie-down strap receiver for
winding one end of a tie-down strap therearound;

5 said stem portion having a hook member movably mounted thereon which is adapted to
selectively releasably engage the lower end of said stand-off plates, when said
stem portion of said winch assembly is inserted downwardly into said pocket
area, to anchor said winch assembly;

10 said stem portion having at least one hook member movably mounted thereon which is
adapted to selectively releasably engage the lower end of one of said stake
pockets, when said stem portion of said winch assembly is inserted downwardly
into the stake pocket area, to anchor said winch assembly.

A/

REMARKS

Approval and entry of this amendment is respectfully solicited.

15 Respectfully submitted,

Dennis L. Thomte
